

Mesa 4. Dimensión poblacional y socioeconómica del gobierno urbano

Fernando Viviescas Monsalve
Coordinador

Bogotá, Septiembre 16 de 2025

The logo for the 20th anniversary of the Institute of Urban Studies (IEU) is displayed. It features the text 'INSTITUTO DE ESTUDIOS URBANOS' in white and orange, followed by a large '20' in orange with the word 'AÑOS' next to it, and the years '2005 - 2025' at the bottom. Below the main text is a small graphic of three horizontal lines. At the bottom of the slide, there are logos for the organizing institutions: 'INSTITUTO DE ESTUDIOS URBANOS 20 AÑOS', 'UNIVERSIDAD NACIONAL DE COLOMBIA', and 'ESCUELA SUPERIOR DE ADMINISTRACIÓN PÚBLICA'. On the right side, there is a logo for 'Cámara de Comercio de Bogotá'.

LA METRÓPOLI: LA GENTE EN MULTITUD

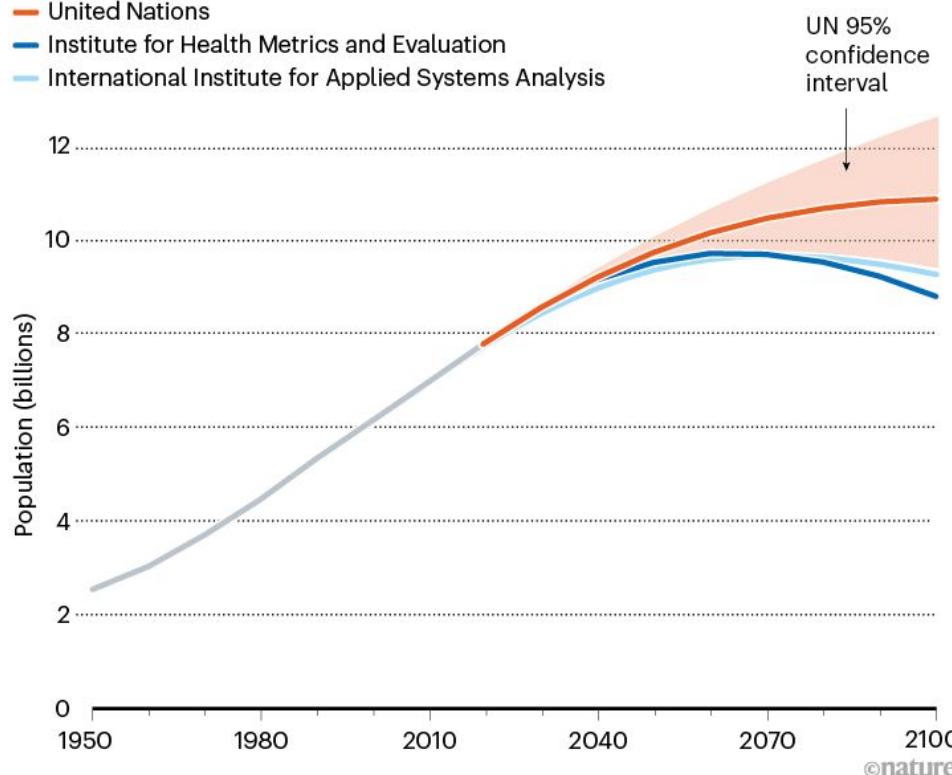

-LA MATERIALIZACIÓN DE LA R-EVOLUCIÓN HUMANA-

PEAK PEOPLE

The United Nations projects that global population will reach close to 11 billion by 2100, significantly higher than estimates from two other organizations.

Projection

- United Nations
- Institute for Health Metrics and Evaluation
- International Institute for Applied Systems Analysis

The [UN says world population will plateau at 10.9 billion](#) by the end of the century. The other groups forecast earlier and smaller peaks, with global population reaching 9.7 billion by 2070 and then declining.

The difference poses a conundrum for governments, companies and others trying to plan for everything from investment in infrastructure and future tax income, to setting goals for international development and greenhouse-gas reductions.
